were ingested for the recovered stream and have since not been purged, followed by reingestion of the correct data. Data team requested re-ingest of all

Data generally suspect due to multiple changes in ingestion pathways since last ingestion in May 2016. See annotations for GA03FLMA-RIM01-02-CTDMOG040, where it was identified that both telemetered and recovered data were ingested for the recovered stream and have since not been purged, followed by reingestion of the correct data. Data team requested re-ingest of all data on GA03FLMA in June 2016.
